

Feel the CARESOFT EM[®] Difference...

COMFORT – Baths, showers, shampoos, and shaving are a wonderful new experience. By removing the hard-water pollutants, you eliminate sticky soap curd which clings to your skin. Your skin feels smoother and cleaner. Treated water leaves your skin smoother and feeling better.

PROTECTION – Hard-water pollutants form a scale that can ruin your water heater, plumbing, and other water-using appliances. With CARESOFT EM, your laundry will come out brighter, cleaner, and softer than ever before. Dishes and glassware can be left to drip dry without the worry of hard-water spotting.

SAVINGS – You save up to \$.75 on every dollar you are now spending on soap, detergents, shampoo, cleaning aids, and personal care products.

After Sale GuardianCare[®] customer service is available from your WaterCare[®] dealer – a factory trained expert who is a respected member of your community.

CARESOFT EM[®]

ELECTRONIC WATER SOFTENER The Intelligent Water Treatment Systems

Contact your WaterCare[®] dealer today for more information.

WATERCARE[®] WARRANTY

WaterCare[®] warrants its CARESOFT EM Water Softener to be free from defects in materials and workmanship for a period of one year from the date of purchase when installed and operated within recommended parameters.

Ask your WaterCare dealer for full warranty details.

WATERCARE'S CARESOFT EM ELECTRONIC WATER SOFTENER

WaterCare® quality in solid-state electronics... microprocessor with LED display, 12-volt system simplifies installation and maintenance and reduces electrical hazards.

HERE'S HOW CARESOFT EM® WORKS:

This board analyses your daily water consumption and adjusts the regeneration cycles accordingly.

1. MICROPROCESSOR – With electronic metered/smart technology, you save hundreds of gallons of water making the CareSoft one of the most efficient and environmentally friendly water treatment choices for you and your family. You can go green twice by being environmentally conscientious and saving money at the same time.

2. TURBINE METER – State-of-the-art accuracy in metering home water usage. Save as much as 50% on water during regeneration...as much as 50% on salt...and save on sewer taxes due to fewer regenerations. Made of the finest materials, sealed magnetic pulse for years of dependable service.

3. BY-PASS – Provides unconditioned water for outdoor use by a simple turn of the handles. Allows complete serviceability without water supply interruption.

4. CARTRIDGE – Provides total control of water flow through all cycles of regeneration. The motor-driven piston resists corrosion from rust or sediment.

5. CONTROL CENTER – Automatic 7-cycle control center, ...glass-filled Noryl® for corrosion resistance and longer life.

6. TIME BRINE SYSTEM – CARESOFT's brine system accurately measures brine quantity and eliminates wasteful oversalting, resulting in lower operating costs. Safety float assembly prevents overfilling of Saltkeeper for added protection.

7. OUTLET DISTRIBUTOR – 1" distributor with basket screen base provides maximum water flow to your home and for regeneration, protecting and extending the life of the resin. Made of polyvinyl chloride for long lasting dependability.

8. CAREX RESIN – Made to WaterCare's specifications for the highest possible capacity for hardness and iron reduction.

9. SALTKEEPER – Made of virtually indestructible, corrosion-resistant polyethylene. Stores enough salt for several months (depending on water conditions).

10. PRE REFILL – Soft water is added to the saltkeeper 2 hours before scheduled self cleaning cycle. This produces the highest quality brine possible, and eliminates extra moisture buildup in the saltkeeper, thereby preventing bridging problems with salt.

11. POLYGLASS MINERAL CYLINDER – Has the National Sanitation Foundation Seal of Approval. Hygienically clean. Made of rugged, durable polyglass for rust-free, corrosion-free service.

12. INSULATED SLEEVE – Prevents moisture buildup. Keeps mineral cylinder dry year round.
